How was I last week?

Anastasia Obrezkova

Last updated on Dec 13, 2020 · 1 min read · Demo

```
import libr
print('hello')
```

My last week

I had a wonderful time last week doing lots of tasks and work. This included lab work, programming, and creating reports, presentations, and papers. In addition, I was able to relax this weekend outside in the nice weather.

I think I spent last week productive and useful because I completed all my assignments and work on time and spent my free time with my favorite people and activities.

Markdown Markup Language: Format Your Text

Markdown is a markup language for creating formatted text using a plain-text editor. Its key design goal is readability: the language is readable as-is, without an abundance of tags or formatting instructions. This is in contrast to HTML, for example, which has obvious tags and formatting instructions that make it harder to read for humans.

Markdown is used extensively by programmers in the software engineering industry. However, it's also widely used in:
